

What's New in InstantPlanner 3.9?

Find below information about InstantPlanner 3.9. This information can also be found in the [InstantPlanner Online Help](#). If you have any questions, send an e-mail to support@instantplanner.com.

Windows Vista

InstantPlanner now supports the following operating systems: Windows XP, Windows 2000 and Windows Vista.

What's New in InstantPlanner 3.8?

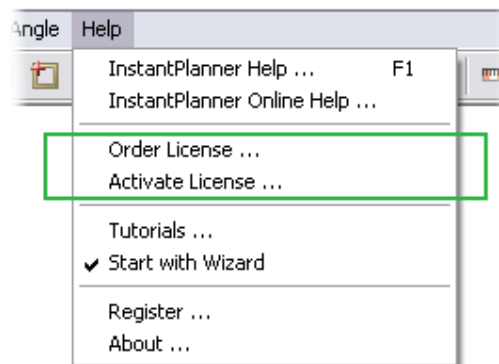

Find below an overall description of the main updated feature in InstantPlanner 3.8. This information can also be found in the [InstantPlanner Online Help](#).

Simplified License Order and License Activation

InstantPlanner 3.8 offers an easier way to order and activate licenses. It is now also possible to pay for your license order online with your credit card.

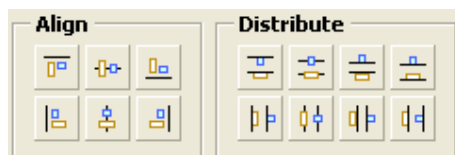

To order an InstantPlanner license click the 'Help' menu and choose 'Order License'. You will then be guided through the ordering process by the 'Order License' wizard.

If you wish to activate an InstantPlanner license click 'Activate License' in the 'Help' menu.

Align/Distribute

InstantPlanner 3.8 includes an improved Align/Distribute dialog in which you now, for example, can distribute components by their centers or by their edges.

Import of .sat files

With InstantPlanner 3.8 it is possible to import CAD drawings with the file format sat. This means InstantPlanner now supports three file formats for import of CAD drawings; dwg, dxf and sat.
